Introduction

There are a lot of trading platforms in the market where users can trade in cryptocurrencies or metal exchange or forex or stocks market. However, there are a very few platforms which allow users to trade in all of the above assets from a single platform. The ones which are available also do not have optimized trading engine and often have very low liquidity. In such cases, it becomes difficult for normal traders and investors to trust on any platform where they can securely store their funds and trade in any kind of assets they like without the hassle of managing multiple accounts in multiple applications. Users will also be able to use banking services using cryptocurrencies on the SatoshiFx platform.

Trading world needs a single platform which is fast, and immune from unnecessary incoherence. A system which is dependable, effective and makes trading easy. SatoshiFx creates the first true Cross-asset blockchain-based trading network that will connect individuals, prime brokers and corporations, adhering to real-world payment problems by providing simple, effective, secure payment and cross-border trading solutions.

SatoshiFx also has crypto mining farms which mine cryptocurrencies like BTC and ETH which are then directly used to increase liquidity of the SatoshiFx platform. Investors on the SatoshiFx platform who want to do either short or long-term investment can also stake cryptocurrencies to get high interest rates.

SatoshiFx also provides an advanced hedge fund accounts and will allow investors to manage their investments through the platform.

SatoshiFX Mission

SatoshiFX aims to provide its users with all kinds of trading and investment opportunities in Stocks, Forex, Metal and Cryptocurrency trading. Users always remain the prime concern of SatoshiFx and the complete platform is developed keeping in mind the needs of users and ease of use of the platform. The platform features deposits and withdrawals through multiple methods like bank transfers, cryptocurrencies and credit/debit cards making it convenient for users to onboard on the platform and use it.

SatoshiFX Vision

SatoshiFX aims to become the biggest trading and investing platform in the world providing services to users globally. We aim to increase liquidity in all our platform products to make trading seamless and easy for everyone. SatoshiFx also aims to onboard users everyday to make more people financially independent through the art of trading and investment.

Key Industry Problems

- 1 Low liquidity: There are a lot of forex and cryptocurrency exchanges in the market but most of them suffer from low liquidity which gives bad trading experience to users.
- 2 Security flaws: Many of the exchanges suffer from security flaws which many times result in users losing their funds to hackers.
- 3 Complicated UI/UX: The design of the platform is sometimes so complicated that users cannot perform the very basic functions in the system.
- 4 Lack of deposit/withdrawal methods: Exchanges do not support multiple deposit/withdrawal methods for users which is crucial for ease of use of the platform.
- 5 Zero utility coin: Many cryptocurrencies in the market are not backed by any utility and thus there is no long-term growth of such cryptocurrencies.
- 6 Low yield mining farms: Many crypto mining farms do not have sufficient resources to give maximum efficiency and yields.

SatoshiFX Solution

- 1 High Liquidity platform: SatoshiFx platform offers high liquidity in its exchange to ensure that orders and trades get executed seamlessly for everyone.
- 2 Highly secure: The platform incorporates multiple security features in all the exchange products and furthermore integrated with MetaTrader 5 hack-proof solution for forex traders.
- 3 Simplistic UI: The ergonomic and engaging UI of SatoshiFx platform makes sure that beginner and advance users can use the platform alike.
- 4 Multiple deposit/withdrawal methods: SatoshiFx platform provides multiple deposit/withdrawal methods like bank transfers, credit/debit cards, cryptocurrencies etc enabling excellent user experience.

High utility coin: The STF token is a high utility token and integral part of all SatoshiFx products which helps in ensuring the growth of token. The token can also be used in deposit/withdrawal process and can be traded on external exchanges as well.

High efficiency mining farms: The state-of-the-art crypto mining farms offered by SatoshiFx provide high yields because of the optimal environment where the machines are placed.

SatoshiFX Ecosystem

SatoshiFX Cryptocurrency Centralized Exchange

SatoshiFx offers a centralized cryptocurrency exchange to its users with a high efficiency and optimized order matching engine to ensure that trades execute as quickly as possible. The centralized exchange offers a plethora of cryptocurrency pairs to trade with high liquidity in the exchange. The platform supports Bitcoin, Ethereum and other altcoins to be traded with ease. With a simplistic UI integrated into multiple trading indicators and methods, the exchange provides a very unique trading experience to its users.

The centralized exchange also allows users to invest in cryptocurrencies by buying the tokens and holding them into their accounts wallet provided to each registered user. The user can deposit the supported tokens from any other wallet by transferring the tokens to the wallet's public address. Similarly, user can withdraw these tokens anytime.

The centralized exchange is secured with multiple solutions like SSL, encryption techniques, captcha, and 2FA among others. Thus, the users funds are always secured with multiple layers of security. Furthermore, most of the funds are stored in cold storage of the exchange for more security.

Thus, SatoshiFx centralized exchange provides a convenient way to trade and invest in cryptocurrencies.

SatoshiFX Cryptocurrency Derivative Exchange

Developed for experienced and advanced users, SatoshiFx derivative exchange provides means to trade in Futures and Options contract of major cryptocurrency pairs. Equipped with a highly efficient trading engine, the derivative exchange allows traders to open positions in perpetual futures contracts and options contract.

The derivative exchange also helps traders in hedging liquidation risks by providing prompt notifications of maintaining their margin balance to avoid liquidation of funds when market goes sideways in an open position.

Thus with multiple trading indicators, an efficient trading engine and an informative dashboard, SatoshiFx derivative exchange becomes one of the most useful platforms for advance traders.

SatoshiFX DEX and Staking

SatoshiFX also provides a decentralized exchange solution to traders who want to trade directly from their self-managed wallets. The SatoshiFx Dex is built upon smartcontracts and supports multiple blockchains for trading. The trading engine as well as the order matching engine are built over highly optimized smartcontracts utilizing the power of transparency and immutability of the blockchain. Users can be assured that no one can see their funds, trades and financial strategies without their approval. Also, users manage their own wallets and trades and thus are not dependent on any intermediary to manage their finances. Thus, the SatoshiFx Dex helps in making users more financially independent and aware. SatoshiFx will also serve as a staking platform. Staking is an activity where a user locks or holds their funds in a cryptocurrency wallet to participate in maintaining the operations of a proof-of-stake blockchain system. By staking, traders can diversify their income stream and monetize their funds on exchanges. SatoshiFx's staking annual percentage yield stands at 100% returns. Built on smart contracts it offers security and decentralized transactional system. Apart from earning passive income on their holdings staking helps in maintaining the security and efficiency of the blockchain.

SatoshiFX Forex Exchange

The foreign exchange market is a global decentralized or over-the-counter market for the trading of currencies. SatoshiFx's Forex exchange aims at providing the best tool to its users and traders. Around the globe forex exchanges tend to suffer a lot due to poor connectivity which in return is an unsatisfactory experience for traders. SatoshiFx targets to give a safe a-list exchanging experience to all customers. A different scope of Forex exchange experience through a wide scope of exchanging choices, techniques, instant auto-deposit and auto-withdrawal options for users. SatoshiFx's forex exchange platform is equipped with extremely efficient and modern MT4 and MT5 technologies. Currently, Metaquotes provides only US Dollars as base currency but SatoshiFx will provide cryptocurrencies like Bitcoin, Ethereum and US Dollar Tether as base currencies to its users which can then be used to place orders in Forex markets. SatoshiFx with its game changing idea of integrating cryptocurrency into Forex trading makes trading more lucrative to forex and crypto traders alike. MT4 is the go to technology that allows traders to use all the tools necessary to manage trades and analyze the markets. Meanwhile the advanced MT5 gives an extra edge to forex traders because of its balance. SatoshiFx provides a platform with high connectivity and fluidity to ensure smooth trading experience. It offers assorted exchanging and promoting choices to its clients. Where most of the forex trade plunge down after a point, SatoshiFx has the potential of up to 400% of leverage return with a significantly low trading fees. SatoshiFx also provides state-of-the-art non-hackable platform where all the funds are deposited and withdrawn from cold-wallets to make sure that all transactions are highly secured along with the security of blockchain. All the trades and transactions through SatoshiFx platform are secured with multiple levels of security like SHA256 encryption, 2FA authorization, Anti-CSRF technique, XSS clean etc.

SatoshiFX Metal Exchange

SatoshiFx also makes trading in metal markets available to its users. Trading in precious metals has been on rise since past couple of decades. Gold and silver are the major players when metal trading is considered. This is why gold and silver be added as initial commodities on SatoshiFx metal exchange trading platform. Furthermore, as the platform expands, more metals like platinum, palladium etc will be added on the platform for users to trade.

The global metal trading market is huge and SatoshiFx team considers that it is necessary for its users to be able to make investments and trades into this market. The platform also provides trading indicators, signals and other trading instruments to trade in this market.

SatoshiFX Mining

SatoshiFx operates crypto mining farms in USA, Middle East and Russia. Crypto mining is the process by which new units of computerized currencies are created. Miners are essential for the blockchain network that guide in checking and recording the transactions of digital assets. In return, they are repaid with a modest quantity of the digital money being executed. Bitcoin mining is the process of creating new bitcoins by solving a computational puzzle. In the Bitcoin mining, miners receive is an incentive that motivates people to assist in the primary purpose of mining Bitcoin mining is important to keep up with the record of exchanges whereupon bitcoin is based. Mechanism have become extremely modern in the most recent times. SatoshiFx offers a platform for safe and profitable bitcoin mining.

Why SatoshiFX is Disruptive?

Liquidity

Since the rise of cryptocurrency, exchanges have experienced slow-downs and technical issues. Cryptocurrencies are being traded at many different exchanges, which means that there is a lot of money moving between them. This influx of transactions has led to a decrease in liquidity as the value of these transactions has decreased. The lack of liquidity in the crypto markets strangles the users and deprives them from making a concrete decision putting their stakes at risk. SatoshiFX aims to provide high liquidity and buying limits putting an end to the problem of unfair liquidations.

24/7 Customer Support

Customer support is the first touchstone of accountability for any service provider. Numerous Crypto trades all over the planet come up short on assets for a fast and skillful client service. They lack the resources for a quick and competent customer support. Customer service of SatoshiFX aims to provide highly qualified tech professionals who additionally knowledgeable with Ins and Outs of market. SatoshiFX operates a call centre in India to provide 24*7 customer service to its users. With a highly efficient tech team in-house, SatoshiFX has also launched a one-of-its-kind AI system integrated into the customer support system to make the support services more seamless and hassle-free.

High Function and Security

When millions and billions of assets are traded digitally, there is no room for functional and security lapses. SatoshiFX is built to support high volumes of trades. Keeping in mind the scalability, it can withstand an immeasurable amount of traffic while maintaining the speed of the platform. SatoshiFX security is constructed with highest security standards. Fast servers ensure 0 downtime and provide uttermost security. All the transactions happening in SatoshiFX takes place through cold wallets which increases security of the platform while compromising little on time.

Technical Aspects of SatoshiFX Platform

- 1 Two-factor authentication (2FA): This additional layer of security helps in authenticating users through one more step of verification.
 - 2 KYC (know your customer): Identifies customers individually and verifies crucial details to avoid identity theft and other forms of fraud.
 - 3 AES encryption prevention: A sophisticated encryption algorithm has been used in the platform that decrypts encrypted confidential data.
 - 4 Anti-CSRF token: CSRF is Cross-site Request Forgery, which is a type of attack in which a malicious actor makes an unwanted action on a trusted site. Preventive measures have been taken in SatoshiFx platform.
- XSS clean: This will help to avoid SQL injection attacks and protect the stability and security of the exchange.

- 5 PHP end of support: SatoshiFx uses the latest version of PHP to avoid the sizable security gaps of old versions.
- 6 High performance order matching engine: High performance order matching engine in the exchange helps in executing trade quickly.
- 7 Multichain smartcontracts: Smartcontracts developed over multiple blockchains help in running the SatoshiFx Dex in a transparent and decentralized manner.

STF Token and Features

STF token is a Binance Smart Chain based BEP20 token that will be the heart of the platform. STF token can be used to pay for services of SatoshiFx platform, pay trading fees, or transfer money among users. The trading will also be lowered when trading is done through STF token pairs. No transaction fees will be charged when consumers pay to the merchants with STF token.

STF is a high liquidity token which is paired with many other cryptocurrencies for trading. STF token has huge utility in all platform features and services.

STF token is connected with the real gold in the SatoshiFx platform. Users can invest money on the platform and get 60%-90% return in real 99.99% purity gold and remaining in STF token. This investment technique ensures that user's investment always appreciate in value.

SatoshiFX Tokenomics

STF token is a high utility and high liquidity token which will be used to pay fees for using various features of SatoshiFx platform. The initial investors of SatoshiFx token will benefit from low price of STF token Initial Offering. The funds raised through token sales will be used for infrastructure of the platform and mining farm.

Invest in Satoshi FX

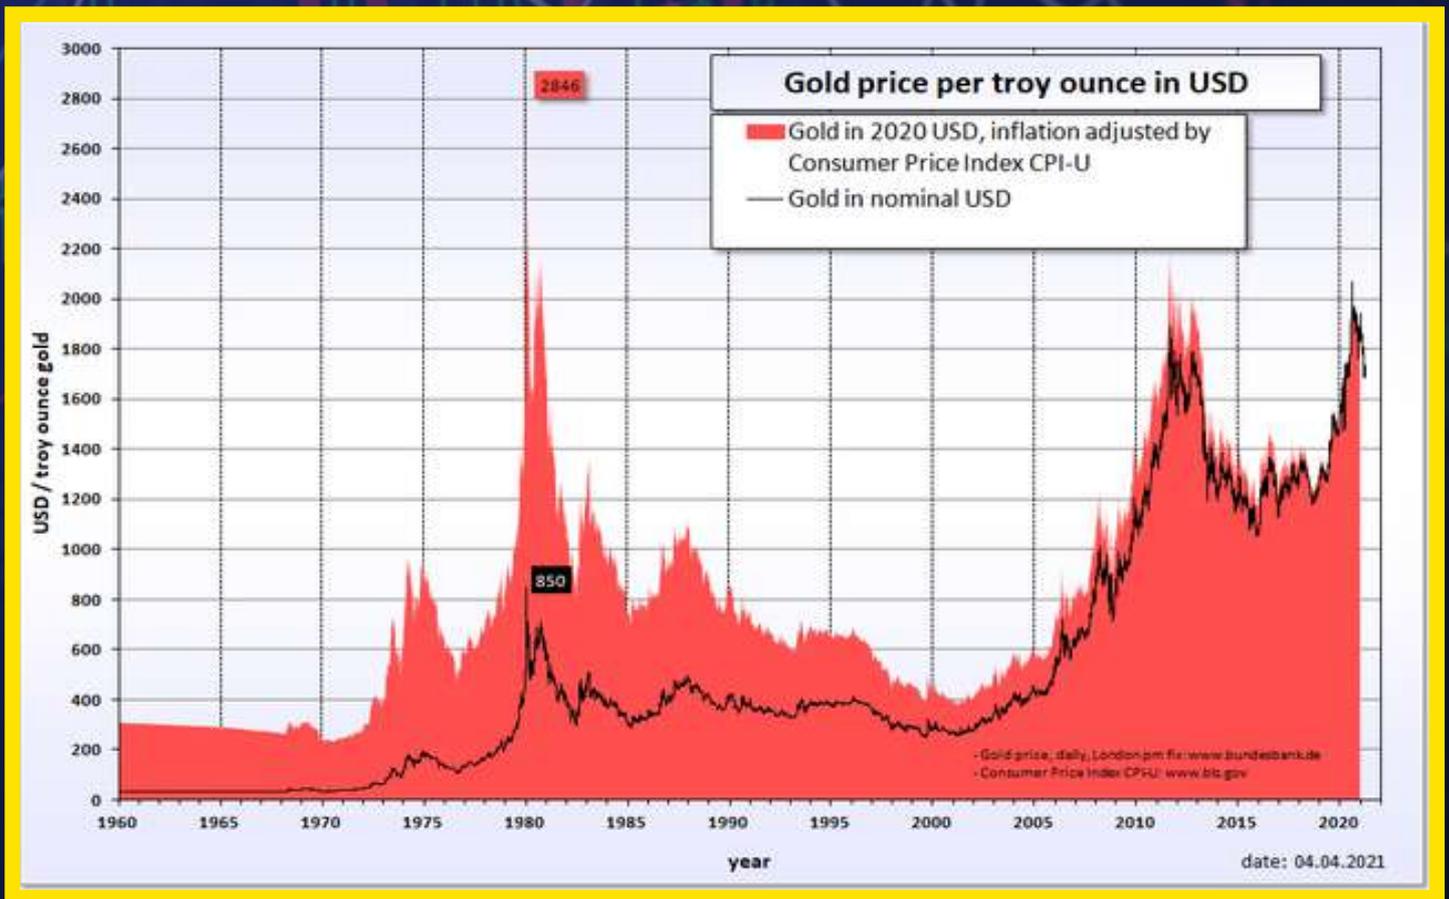

The most rewarding gold staking strategy

Satoshi fx launches first its kind opportunity to invest in its stf tokens, backed by gold.

Satoshi fx blockchain projects include regulated centralised crypto exchange, decentralised crypto exchange, derivative exchange, wallet, custody, mining, payment solutions, gold stable coin and much more

Why Gold

Gold has been a highly preferable investment tool because of the high returns and liquidity it offers. In comparison to other forms of investment like stocks and bonds, gold has proven to be an asset that is easy to liquidate and thus, in times of an emergency, it can easily act as an investment cushion. Gold outperformed consistently to major investment including Bonds, stocks and other commodities

Reason why Gold is the best Investment option

1. A Top Investment Tool to Beat Inflation

Gold is considered good hedge against currency debasement and inflation. When the equity markets crashed last year, gold had a bull run for several months- a trend that experts predict will continue in the current state of economic turmoil.

2. A Low Rate of Interest

The Covid-19 pandemic wielded a massive impact on the world economy. Amid inflation and continued uncertainty regarding the virus, Central banks around the world have been cutting interest rates. Investors have moved from fixed income to gold in a low rate environment.

3. Easy Liquidity

Gold has been a highly preferable investment tool because of the liquidity it offers. In comparison to other forms of investment like stocks and bonds, gold has proven to be an asset that is easy to liquidate and thus, in times of an emergency, it can easily act as an investment cushion.

4. A Tangible Source for Wealth Creation During the Current Pandemic

Gold emerged as a major asset class during the current crisis. Its performance was fairly stable during the two waves of the pandemic, which made a lot of new investors hop onto the gold bandwagon.

5. It is One of the Safest and Most Effective Portfolio Diversifiers

Financial experts opine that gold is one of the best ways to add a stabilizing element to one's financial portfolio. One of the biggest factors that make it the right addition to one's investment map is its low to negative correlation with most other asset classes.

What is STF Gold

STF Gold coins are, gold currency, backed by 100% Gold and Gold Equivalents.

You can Invest in STF only through STF Gold

SATOSHI FX give opportunity to its Gold Coin holder, to invest in STF Token. The Holders of STF token shall be part of huge upside growth potential of SATOSHI FX as platform and blockchain eco system.

SATOSHI FX Eco system constitute of Regulated Centralised Crypto Exchange, Custodian services, Secure Wallets, Proprietary trading, OTC desk, P2P payment platform, and Crypto Mining. SATOSHI FX has presence in UAE, USA, EUROPE and develop a regulated, transparent, freely tradable, fully redeemable gold Coins that can scale to millions of ounces (billions of dollars USD).

The Four required characteristics for establishing STF GOLD token are:

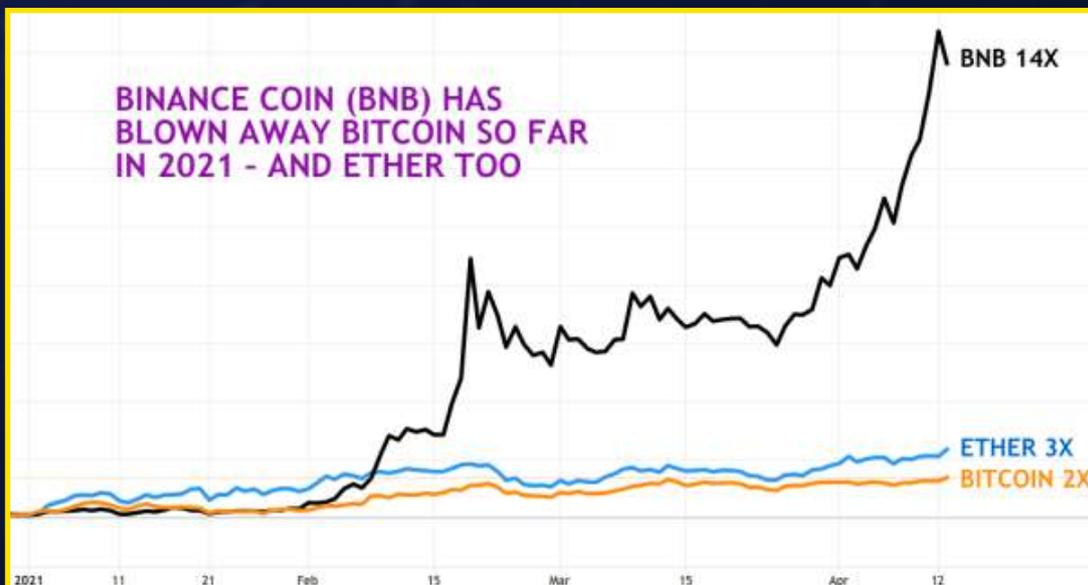

- Transparency – Establishes trust
- Regulation - Establishes confidence for partners
- Redeemability – Provides a purpose
- Liquidity - Makes it useful

What is Opportunity for Investors

Investors always made huge money if they invested in right projects at the right time. If you had invested in bitcoin when it was first launched in 2009, your returns could be in the millions or billions, because the initial value of the asset was \$0. Say you got into the game when a bitcoin was 10 cents, around October 2010. If you invested \$100, you'd have been able to buy about 1,000 bitcoins (Aprox USD 44 Million)

Similarly if you invested in BNB (Binance) when it launched in 2017 at USD 15 Cent . your USD 100 would have been USD 2.97 Million

There can be more upside in these kind of project but making such returns are now impossible SATOSHI FX project present a similar Investment opportunity today. Our believe system always put Investors first. We believe that your investment should be tangible, secured and have potential to make great returns on Investments

SATOSHI FX project is backed by experienced and successful promoter with 45 Years of standing. There is unlimited upside and huge ROI for investors as their investment is not just STF Tokens but it is backed by real Gold with first of its king Gold STAKING strategy to make additional ROI for the investors.
